

Before the
FEDERAL COMMUNICATIONS COMMISSION
Washington, DC, 20554

In the Matter of)
Creation of a Low)
Power Radio)
Service) MB Docket No. 99-25

My name is Wil Hadley, and I strongly support all actions the Federal Communications Commission can take to expand and support the Low Power FM radio service.

In our particular case, KPUP-LP, we have a need to be able to transfer our License to the collective of individuals that maintain the station. Our 501c3 board wishes to transfer all interests in the radio station (license) to the KPUP-LP community management collective. It would also be great if we did not HAVE to incorporate our collective as a non-profit. This would simplify and streamline our organizational structure allowing more time and money to be put into the station.

Our station also has a need to be protected from encroachment by translators and Mexican stations that refuse to operate within legal tolerances of frequency, power, or modulation. Primary status would be great, especially since community radio is so valuable to the people we serve.

A few other things. Please include LPFM as a major stake holder with regard to the anticipated digital migration. LPFM's are well positioned locally to help promote and evolve the use of digital radio spectrum. Please also re-examine all the punitive measures currently in place against LPFM's such as: 'type certified transmitters' and '18 month CP's.

We do appreciate the opportunity to continue to participate in this process, with integrity.

Thank You.
